

Thank you for the opportunity to express my concerns over BPL. I will make this brief. As a concerned US citizen and radio amateur, I am strongly opposed to the implementation and use of BPL for obvious reasons which should be very clear to the FCC. BPL will not only disrupt communications between radio amateurs but cause unwarranted interference with shortwave listeners, military, government and civilian communications that use the radio spectrum. I urge the FCC to NOT approve this insane proposal. Thank you!
